Abstract: The Program for International Student Assessment (PISA) is an international assessment that focuses on 15-year-olds' capabilities in reading, mathematics, and science literacy. It was first implemented by the National Center for Education Statistics (NCES) in 2000 and has been administered every 3 years since. This submission is for the fifth cycle in the series, PISA 2012, and requests OMB approval for the main study recruitment and data collection, and for student contact information collection for a future follow-up study. As in 2003, in PISA 2012, mathematics will be the major subject domain. The field test will also include computer-based assessments in reading, science, and general problem solving, and an assessment of financial literacy in a paper-and-pencil format. In addition to assessment data, PISA provides background information on school context and student demographics to benchmark performance and inform policy. School recruitment for the field test will begin in September 2011 with data collection beginning in September 2012. NCES will submit to OMB the final versions of the main study data collection instruments in March 2012.
